Subject: Can I Trust NOAA?

Dear Dr. Jacobs,

Am I to understand that NOAA will now be intentionally providing the public with false or misleading weather forecasts for the direct purpose of sparing President Trump's feelings? Will NOAA provide the public with false or misleading weather forecasts due to the fear of punishment from the executive branch? My inquiry is sincerely motivated. I need to know if NOAA's forecasts are based on science and technical skill or feelings and executive branch directives. Thank you.

Ed Doherty
